This is a very short function that leverages a Node.js package, fs. It allows us to interact with the operating system (for example to read or write files to it). This is exactly what we need in order to be able to read our data source file. The code itself follows the standard Node.js callback mechanism.

~~How to Automate Simple Tasks with Node.js~~

Automate your workflow with the power of Node.js! If your job is loaded with manual work, then why not write scripts that can deal with it for you? With this book, you will learn how to deal with many tasks such as zipping files, emailing colleagues, and deploying your work at the press of a button. The book is structured into two parts: The first part is a collection of recipes, or building blocks that behave as individual global commands.

Adding a new command to the CLI is as simple as that. Now, `ocliif_cli` add command is ready to be used. However, we still have to implement its internal logic. To achieve this, we should change the already created `add.js` file inside the `src` directory.. The fully-implemented add command should be able to accept an argument that specifies the weight of the user and record it with a timestamp.

~~Learn How to Build CLI Automation Tools with NodeJS~~

While testing with Node.js, you should try to follow the test automation pyramid. As seen from the following image, the unit test should be taken as the base of all the testing.

The `selenium-webdriver` Node.js package comes with a module that may be used to write tests that run with the Mocha testing framework instead. You can further automate your browser integration tests by hooking Selenium WebDriver up to a cloud-based Virtual Machine setup, such as that provided by SauceLabs or BrowserStack.

~~Browser automation using Selenium WebDriver and Node.js ...~~

Workflow Automation with Node.js and Express. One of the more abstract concepts you'll handle when building your business is what the workflow will look like. At its core, setting up a standardized workflow is about enabling your service providers (agents, hosts, customer service reps, administrators, and the rest of the gang) to better serve your customers.
