Of course the big advantage of the 1.6 i-DTEC engine is economy. As it is front wheel drive and considerably lighter, it means better fuel consumption - up from 50.4mpg in the 2.2 i-DTEC to 62.8mpg in the 1.6 i-DTEC. CO2 is much lower too meaning cheaper annual car tax while it's a much more attractive choice for company car drivers.

A tale of two i-DTEC diesels | Our Cars | Honest John

The big step forward came with the introduction of variants fitted with this 1.6-litre i-DTEC diesel engine, a unit which transformed this car's chances. Choose one in a decent trim level and you'll have a Honda that drives brilliantly, offers stellar economy and efficiency figures, is safe, spacious, reliable and still looks smart.

Honda Civic 1.6 i-DTEC (2013 - 2015) used car review | Car ...

The i-DTEC engine uses a 2-Stage turbocharger from Wastegate Type & Variable Geometry Turbocharger (VGT) left/right. It enables strong power from about 1,500 rpm. With Diesel particulate filter (DPF), IDLE STOP SYSTEM, Exhaust gas recirculation SYSTEM (EGR) & Small Size Intercooler.

Honda N engine - Wikipedia

The 1.6-litre i-DTEC engine has also been revised. New forged steel pistons replace the aluminium jobbies found in earlier incarnations of this power plant and help to reduce friction and cooling...

Honda Civic 1.6 i-DTEC 2018 review | Autocar

Honda Civic 1.6i-DTEC diesel is the right choice for high mileage fleets 10/12/2018 "There is typical diesel chatter when the car is started but for overall refinement, the 1.6-litre unit is...

Honda Civic i-DTEC SR diesel review | Company Car Reviews

Our extended test car uses the 1.6-litre diesel engine, and this is paired with four-wheel drive and a nine-speed automatic gearbox. Honda says this combination means it can achieve 55mpg and emit 139g/km. Also of note: it's got a tow bar to which you can fit a bike carrier, which will undoubtedly see some use.

Extended test: 2017 Honda CR-V 1.6 i-DTEC

Fitting the 1.6-litre diesel engine from the Civic and removing the four-wheel drive system means this model is 116kg lighter than the 2.2-litre i-DTEC and Honda claims that this means it is also...

Honda CR-V 1.6D review | | Auto Express

Engine technological innovations evolved over year by year. After Multi valve technology the VVT becomes to enhance engine output. VVT - Variable Valve Timing Valves are crucial role playing components in engine breathing. The timing i.e: Air inta...

What is the difference between VVT, i-VTEC and i-DTEC ...

Opt for the excellent 1.6-litre i-DTEC diesel engine and you'll be a stranger at your local filling station. The old 2.2-litre diesel and 2.0-litre petrol engines are best avoided. A CR-V with the 1.6-litre engine and four-wheel-drive is an excellent tow car, with a maximum towing capacity of 2000kg.

Review: Honda CR-V (2012 – 2018) | Honest John

VTEC (Variable Valve Timing & Lift Electronic Control) is a system developed by Honda to improve the volumetric efficiency of a four-stroke internal combustion engine, resulting in higher performance at high RPM, and lower fuel consumption at low RPM.The VTEC system uses two (or occasionally three) camshaft profiles and hydraulically selects between profiles.

VTEC - Wikipedia

A high-strength, lightweight slender crankshaft and all-aluminium, open-deck, high-pressure, die-cast engine block minimise the engine's weight. For the new i-DTEC, additional cast ribs have been added to the cylinder block to increase structural rigidity and, consequently, improve the management of noise, vibration and harshness.

Honda Civic 1.6 i-DTEC review | Car review | RAC Drive

The i-DTEC engine has an all aluminum cylinder head which is joined to an open deck engine block. The open deck configuration of the i-DTEC has made it one of the lightest engines among those with a similar capacity and output. The i-DTEC has an exceptionally lighter crankshaft and uses some of the latest friction reducing technologies.

Honda City i-DTEC review, specifications - motownindia.com

The I-DTEC Engine
The term I-DTEC stands for “Intelligent Diesel Technology” and references the type of diesel injection method used. A common rail engine runs at pressures up to 2,000 bar (29,400 PSI) and can inject up to 7 times per cycle per cylinder.
