Esperanto, the most widely spoken constructed international auxiliary language, is estimated to have between 100,000 and 2,000,000 speakers worldwide. This extensive dictionary was compiled both from existing glossaries and from glossaries prepared by Denisowski.

The author presents an overall view of Hegel through his philosophical, political and personal ideas.

The Apostle Paul's reference to the tongues of angels (1 Cor 13.1) has always aroused curiosity, but it has rarely been the object of a history-of-traditions investigation. Few readers of Paul's words are aware of the numerous references and allusions to angelic languages in Jewish and Christian texts. John C. Poirier presents the first full-length study of the concept of angelic languages, and the most exhaustive attempt to assemble the evidence for that concept in ancient Jewish and early Christian texts. He discusses possible references to angelic languages in the New Testament, pseudepigraphic writings (both Jewish and Christian), the Dead Sea scrolls, rabbinic texts, patristic references, magical writings, and epigraphy. The discussion is divided between those witnesses that understand angels to speak Hebrew, and those that understand angels to speak an esoteric heavenly language.

The earliest cases of farmers' suicides in India were reported in 1998 among cotton cultivators in Andhra Pradesh. Soon after, similar reports emerged from Vidharba in Maharashtra and among red gram cultivators in Karnataka. Since then, the issue of 'farmers' suicides' has acquired disturbing proportions. This book contests the conventional notion of farmers' suicides as seen through the limited scope of agrarian economic distress. Through an ethnographic study in the district of Anantapur in Andhra Pradesh, it delves into the transformations in production, consumption, social relationship, and gender identities in present-day south India. Exploring these interconnected shifts, it interrogates the peripheral factors ascribed to farmer suicides and presents an alternative and more nuanced reality behind this grave crisis. The author contends that rural farmer suicides relate to emerging mentalities and interactions around status, equality, and honour in contemporary India.

Tylor's ideology is best described in his most famous work, the two-volume Primitive Culture. The first volume, The Origins of Culture, deals with various aspects of ethnography including social evolution, linguistics, and myth. The second volume, titled Religion in Primitive Culture, deals mainly with his interpretation of animism. On the first page of Primitive Culture, Tylor provides an all-inclusive definition which is one of his most widely recognized contributions to anthropology: "Culture, or civilization, taken in its broad, ethnographic sense, is that complex whole which includes knowledge, belief, art, morals, law, custom, and any other capabilities and habits acquired by man as a member of society." Primitive Culture remained the pinnacle of Tylor's career, important not only for its thorough study of human civilization and contributions to the emergent field of anthropology, but also for its undeniable influence on a handful of young scholars.

New translations of significant political writings of Seneca, the most important Stoic philosopher.

In April 1891, two matters greatly excite the inhabitants of Edinburgh: the decennial Population Census and the Annual General Meeting of the Edinburgh Society for the Propagation of a Universal Language. The General Secretary, Mr Justice, is a militant champion of the highly popular language Volapk; but he is locked in a battle for with Dr Bosman, a shameless apologist for Esperanto. Mr Justice travels the east coast of Scotland in part conducting classes in the grammar and vocabulary of Volapk. En route, he recruits a secret ally an ill-behaved old gentleman who has promised to bring the majority over to the Volapk camp.
