The code of the schoolyard demands laughter at farts, balls, and the sex lives of animals. That same directive guides Every Solution Has Its Problem, the Columbia debut of Florida-based goof-offs Start Trouble. But while they delight in taking toilet-bowl humor, drug references, and Surgeon General's warnings right to the precipice of bad taste, Start Trouble 's shtick leaves a sour aftertaste of mean-spiritedness and cynicism.

If the problem of missing productivity targets remained a problem without any effort to address its' causal factor or factors, then we would have to say that everyone was fixated on the problem rather than being solution focused. One cannot resolve an issue if one is stuck on the issue or the problem.

Norman Vincent Peale - Every problem has in it the seeds...

The trick is to pick the least problematic solution and apply it with care. Every problem has a solution if you look deeply at the problem. This is because a clue to the difficulty lies within it. Through successive fine-tuning of proposed solutions, the final outcome can be more favourable. Go for a solution that solves more problems than it creates.

The solution to a problem is a problem itself

Every problem has a solution; you just need to discover it. You cannot say which solution will, for sure, solve the problem but you can be sure that when you hit the right solution the problem shall vanish. To make it happen you need to have a firm belief on God and thyself.

Frustrated and hopeless, Gerri writes honest farewell letters to everyone she knows before she tries to end it all, but when her suicide attempt fails, Gerri is forced to face everyone she has offended with her final words.

There is no more important lesson in life to understand, then it is your thoughts that create your reality! Your thoughts create your feelings, emotions, behavior and what you attract and magnetize into your life. Many people think that we see with our eyes. The truth is we see through our consciousness, minds and belief system! There are in truth only two philosophies and feelings and emotions in life. The philosophy and feeling of fear, and the philosophy and feeling of Love. The key to realizing God is to only think and feel from your Love based/Spiritual/Christ/Buddha mind. This is why the Bible states, "Let this mind be in you that was in Christ Jesus!" It is by mastering our mind that all negative feeling and emotions can be released and one can learn to live in self mastery, centeredness, unconditional love, joy, peace, forgiveness, nonjudgmentalness and equanimity at all times!

You need not label you. Even if you did, that is fine. You may come in any hue or color-Christian, Muslim, atheist, liberal, conservative, Marxist, black, white, man, woman, homosexual, American, African, CEO, homeless, geek, dunce or any identity. The bottom line is you are a human being. You cannot escape that truth. You cannot bury the inviolable equality that truth brings. Once you are a human being you are an intelligent being. Once you are an intelligent being you have to face and explore the truth of life, including the existence or nonexistence of God. The religious, the atheists, the scientists and the entire world can argue whatever they want. Their arguments do not affect the truth of your existence. You cannot slip into that mess because the world doesn't live your life; only you live your life. If God is true, He or She cannot be limited to the belief of the religious. God must be accessible to the intelligent human being as well. So come on, let us explore God rationally.

This book is concerned with the development of the understanding of the relational structures of information, knowledge, decision – choice processes of problems and solutions in the theory and practice regarding diversity and unity principles of knowing, science, non-science, and information – knowledge systems through dualistic-polar conditions of variety existence and nonexistence. It is a continuation of the sequence of my epistemic works on the theories on fuzzy rationality, info-statics, info-dynamics, entropy, and their relational connectivity to information, language, knowing, knowledge, cognitive practices relative to variety identification – problem – solution dualities, variety transformation – problem – solution dualities, and variety certainty – uncertainty principle in all areas of knowing and human actions regarding general social transformations. It is also an economic – theoretic approach in understanding the diversity and unity of knowing and science through neuro-decision – choice actions over the space of problem – solution dualities and polarities. The problem – solution dualities are argued to connect all areas of knowing including science and non-science, social science, and non-social-science into unity with diversities under neuro-decision – choice actions to support human existence and nonexistence over the space of static – dynamic dualities. The concepts of diversity and unity are defined and explicated to connect to the tactics and strategies of decision – choice actions over the space of problem – solution dualities. The concepts of problem and solution are defined and explicated not in the space of absoluteness but rather in the space of relativity based on real cost – benefit conditions which are shown to be connected to the general parent – offspring infinite process, where every solution generates new problem(s) which then generates a search for new solutions within the space of minimum – maximum dualities in the decision – choice space under the principle of non-satiation over the space of preference – non-preference dualities with analytical tools drawn from the fuzzy paradigm of thought which connects the conditions of the principle of opposites to the conditions of neuro-decision – choice actions in the zone of variety identifications and transformations. The Monograph would be useful to all areas of Research, Learning and Teaching at Advanced Stages of Knowing and Knowledge Production.

This is the first book about the discrete ordered median problem (DOMP), which unifies many classical and new facility location problems. Several exact and heuristic approaches are developed in this book in order to solve the DOMP. Audience:

The book is suitable for researchers in location theory, and graduate students in combinatorial optimization.

From the upper echelons of the scientific establishment comes a completely new definition of reality and the human being. The most advanced physics in the world suggests that accumulated knowledge in all fields is based on a false premise. Time is an illusion and the past does not create the present, but that is not all. All curriculum from grade school to university will need to be entirely overhauled. The end result will be a complete and total reversal of focus that will bring about a new human with entirely new and powerful ways of achieving goals and solving problems. Learn how to become powerful and unstoppable by having the right knowledge. We unknowingly wield immense power. We must recognize the fantastic power we possess and learn to use it constructively. Here and now we have the power to work magic of such proportions we have never fathomed. Yet unseized, such power waits for us to claim it. It is of no use until we awaken to it. It is all here, in the solution.

*\*25th Anniversary Edition\**—with an Introduction by the Author! The Owens sisters confront the challenges of life and love in this bewitching novel from the New York Times bestselling author of *The Rules of Magic*, *Magic Lessons*, and *The Book of Magic*. For more than two hundred years, the Owens women have been blamed for everything that has gone wrong in their Massachusetts town. Gillian and Sally have endured that fate as well: as children, the sisters were forever outsiders, taunted, talked about, pointed at. Their elderly aunts almost seemed to encourage the whispers of witchery, with their musty house and their exotic concoctions and their crowd of black cats. But all Gillian and Sally wanted was to escape. One will do so by marrying, the other by running away. But the bonds they share will bring them back—almost as if by magic...

“ Splendid...Practical Magic is one of [Hoffman's] best novels, showing on every page her gift for touching ordinary life as if with a wand, to reveal how extraordinary life really is. ” —Newsweek “ [A] delicious fantasy of witchcraft and love in a world where gardens smell of lemon verbena and happy endings are possible. ” —Cosmopolitan
