Don't worry, everyone has been there at some point--and while testing and test-driven development are important aspects of Rails development, many tutorials gloss over these components. In Everyday Rails Testing with RSpec, I'll show you how I got past that hurdle, increasing my code's trustworthiness and saving untold time in browser-based testing.

To start, add rspec-retry to the test group in your Gemfile, then bundle install to add it. Then, configure RSpec to use it—I prefer to do this in a separate file like spec/support/rspec\_retry.rb, but you can also include it in your main spec/rails\_helper.rb file, as shown in rspec-retry 's README. Whatever works for you.
