engine by willard w ...

Fuel is injected directly into the cylinder (or into a prechamber which is connected to the cylinder for indirect injection engines), just before (some 5 CAD) the desired start of combustion. High pressure injection produces small, high velocity fuel droplets

Fundamentals Of The  
Internal Combustion  
Engine ...

In an internal  
combustion engine,  
the expansion of the  
high- temperature and  
high- pressure gases  
produced by  
combustion applies  
direct force to some  
component of the  
engine. The force is  
applied typically to

Acces PDF

Internal

pistons, turbine blades, rotor or a nozzle. This force moves the component over a distance, transforming chemical energy into useful work.
