This authoritative and comprehensive handbook is the definitive work on the current state of the art of Biometric Presentation Attack Detection (PAD) – also known as Biometric Anti-Spoofing. Building on the success of the previous, pioneering edition, this thoroughly updated second edition has been considerably expanded to provide even greater coverage of PAD methods, spanning biometrics systems based on face, fingerprint, iris, voice, vein, and signature recognition. New material is also included on major PAD competitions, important databases for research, and on the impact of recent international legislation. Valuable insights are supplied by a selection of leading experts in the field, complete with results from reproducible research, supported by source code and further information available at an associated website. Topics and features: reviews the latest developments in PAD for fingerprint biometrics, covering optical coherence tomography (OCT) technology, and issues of interoperability; examines methods for PAD in iris recognition systems, and the application of stimulated pupillary light reflex for this purpose; discusses advancements in PAD methods for face recognition-based biometrics, such as research on 3D facial masks and remote photoplethysmography (rPPG); presents a survey of PAD for automatic speaker recognition (ASV), including the use of convolutional neural networks (CNNs), and an overview of relevant databases; describes the results yielded by key competitions on fingerprint liveness detection, iris liveness detection, and software-based face anti-spoofing; provides analyses of PAD in fingervein recognition, online handwritten signature verification, and in biometric technologies on mobile devicesincludes coverage of international standards, the E.U. PSDII and GDPR directives, and on different perspectives on presentation attack evaluation. This text/reference is essential reading for anyone involved in biometric identity verification, be they students, researchers, practitioners, engineers, or technology consultants. Those new to the field will also benefit from a number of introductory chapters, outlining the basics for the most important biometrics.

Bobby London's legendary career as an underground cartoonist has spanned decades. London created his most enduring character, the outrageous and irrepressible Dirty Duck in 1971. He was a founding member of the infamous Air Pirates, and produced strips for National Lampoon during the heyday of that massively influential magazine. After departing the Lampoon, the cigar-chomping Dirty Duck and his creator found a home at Playboy magazine. He wrote and drew the syndicated Popeye newspaper strip for six years until a major controversy ended his tenure on Segar's sailor. This oversized volume will collect nearly all of London's influential Dirty Duck strips, from Air Pirates Funnies, National Lampoon, Playboy and other publications. Many of the strips have been scanned from the original art in the artist's vast personal archives, including rare and unpublished preliminary drawings. A contemporary of Gilbert Shelton, R. Crumb and the ZAP crew, London's legacy is a major piece of history in the great American art form. In 1978 London was awarded the prestigious Yellow Kid Award for best writer/artist at the Lucca Comics Festival for his work on Dirty Duck. Introduction by Drew Friedman."

"...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.
