On the L99 engine, pistons are the weak link and you probably already know someone who has popped one. A set of forged pistons is a good idea and you can increase compression while you're at it. They have stronger wristpins, thicker ring lands, and the added valve reliefs allow you to run big cams.

[L99 6.2L Engine Upgrade Guide: Expert Advice for L99 Mods -](#)

The L99 was also equipped with Active Fuel Management (AFM). It's good for gas mileage, but not high performance. If the valvetrain is in good condition, an AFM Disabler can turn the AFM off. When upgrading to a performance cam, an AFM Delete Kit is strongly recommended. These kits replace all the AFM components with standard parts.

So we're sure by now you are wondering just how much power we are talking about, exactly. Well, would you believe that not one of their new L99 cams gained less than 100 horsepower over the stock bumpstick? You read that right. Their new Stage 1 VVT-1.2 L99 cam gained exactly 104 horsepower and 48 lb-ft of torque over the stock stick.
