friends held captive by a mercenary at the behest of his frenemy, a diabolical billionaire technopreneur with a sinister plan. White hat hackers, Din Kamal and his wife, are professional penetration testers, freelance cyber security consultants based in Penang, Malaysia. When Gary Ang, a whistleblower at IoTopia Berhad, secretly copies his employer's top secret data and tries to escape with it, he finds a mercenary pursuing him. While speeding away in his car, realizing the urgency, he uploads to his personal cloud the most important encrypted file and sends Din, the only hacker friend he could trust, a link to the file. During the subsequent high speed car chase across the Penang Second Bridge, Gary crashes his

car. He dives into the sea, manages to escape, and calls Din from a budget hotel at Batu Kawan. Unfortunately, the mercenary abducts him just before Din arrives. Later, after failing to decrypt the file he had downloaded, Din realizes the gravity of the situation and enlists the help of Shila, his sister, a cyber crime investigator of the Malaysian government's cyber crime division to track down the mercenary's identity and employer. Further investigations reveal the identity of the mercenary and his employer, the founder and owner of IoTopia Berhad, a billionaire technopreneur from Penang and Din's longtime frenemy. Din enlists the help of Kumar, a hacker friend to hack into IoTopia Berhad's

Building Information Modelling (BIM) in Design, Construction, and Operations contains the proceedings of the first in a planned series of conferences dealing with design coordination, construction, maintenance, operation and decommissioning. The book gives details of how BIM tools and techniques have fundamentally altered the manner in which modern construction teams operate, the processes through which designs are evolved, and the relationships between conceptual, detail, construction and life cycle stages. The papers

Now there's another way to get more horsepower: boring and stroking your Mopar small-block to get more cubic inches - up to 476 cubes! The small-block Mopar is one of the easiest engines in which to increase displacement without extensive modifications or specialized machine work - the engine was practically designed for more cubes! This book shows you how to get that big-cube power, and then it shows you how to optimize the small-block's other systems - induction, heads, valvetrain, ignition, exhaust, and more to make the most of the extra cubic inches. Author Jim Szilagyi is a Performance Specialist for Dodge Motorsports and Mopar

with chapters on language diversity, language minorities and language endangerment, with authors providing insight into the link between the loss of languages and the loss of species. It continues with an overview of the role of language and discourse in describing, concealing, and helping to solve environmental problems. With discussions on new orientations and topics for further exploration in the field, chapters in the last section show ecolinguistics as a pacesetter into a new scientific age. This Handbook is an excellent resource for students and researchers interested in language and the environment, language contact, and beyond.

This book is about how to develop future automotive products by applying the latest methodologies based on a systems engineering approach and by taking into account many issues facing the auto industry such as meeting government safety, emissions and fuel economy regulations, incorporating advances in new technology applications in structural materials, power trains, vehicle lighting systems, displays and telematics, and satisfying the very demanding customer. It is financially disastrous for any automotive company to create a vehicle that very few people want. To design an automotive product that will be successful in the marketplace requires carefully orchestrated teamwork of experts from
