The International Monetary Theory and
Policy field focuses on the macroeconomic
performance of countries that are integrated
with the world economy both through trade
in goods and services and through the
exchange of assets. A central concern is the
way in which world financial markets
contribute to growth and development as
well as serve as a means by which economic
disruptions may be transmitted across
national boundaries.

In monetary macroeconomics it is important to distinguish between the real rate of interest on money and the profitability of business enterprise. If the former is a monetary phenomenon, as claimed by Keynes, the latter is in the nature of a "surplus" over and above the costs of production, including financing costs.
