Object Design: Roles, Responsibilities, And Collaborations

... Rebecca Wirfs

After more than ten years, object technology pioneer Rebecca Wirfs-Brock teams with expert Alan McKean to present a thoroughly updated, modern, and

Access Free Object Design

proven method for the design of software. The book is packed with practical design techniques that enable the practitioner to get the job done.

Like many human endeavors, design is part art, part engineering, part guesswork, and part experimentation.

Access Free Object Design

Object Design: Roles, Responsibilities, And Collaborations ...

So, why is Object Design: Roles, Responsibilities, and Collaborations (OD) a really great book?

These folks have years of design consulting and teaching experience,

Access Free Object Design

know what they are talking about, and are good at telling the story. OD is a great read from cover to cover.

Object Design: Roles, Responsibilities, and Collaborations, by

Access Free Object Design

Rebecca Wirfs-Brock and Alan McKean, explains how to design software objects and systems. Published in 2003, it contains the latest on Responsibility-Driven Design. The book is organized into two major parts. Like many human endeavors, software design is part art, part

Access Free Object Design

engineering, part
guesswork and
experimentation.

Wirfs-Brock Associates Design Books

Responsibility-driven
design is a design
technique in object-
oriented
programming, which
improves
encapsulation by

Access Free Object Design

using the

client–server model. It focuses on the contract by

considering the actions that the object is responsible for and the information that

the object shares. It was proposed by Rebecca Wirfs-Brock and Brian Wilkerson.

Responsibility-driven design is in direct

Access Free Object Design

Contrast with data-driven design, which promotes defining the behavior of a class along with the data that it...

Responsibility-driven design - Wikipedia

Responsibilities are assigned to classes of objects during object design. E.g., doing

Access Free Object Design

doing itself (like
creating an object)
initiating action in
other objects
controlling and
coordinating action in
other objects knowing
Knowing about private
encapsulated data
knowing about related
objects
