It is now generally recognized that literacy is multiple and woven within the sociocultural lives of communities, but what is not yet fully understood is how it is multiple--how this multiplicity plays out across and within differing sociocultural contexts. Such

The 1970s and 1980s have been marked by turbulent times for certain portions of America's industrial base, as their dominance of many domestic and foreign markets has eroded. During such times of stress it is tempting to create scapegoats in order to rationalize shortcomings. Much is heard about the Japanese in this regard.

How they have contributed to the deterioration of specific segments of American industry, how jobs in the U. academic. Cold spray technology has made great dramatic strides over the last 10 years and is now being used extensively in the aerospace, electronics, automotive, medical, and even the petrochemical industries. Most recently, cold spray of near-net shaped parts was accomplished – something previously assumed to be impossible because of the
