The Sri Lankan chronicles are based on even earlier works and that the Theravada Buddhist canon was first put into writing in Sri Lanka. The chronology of the following list is based on the traditional Therevada/Sri Lankan system, which is based on 543 BC—60 years earlier than the Mahayana calendar. Dates after c. 1048 are synchronous.

There have been fourteen Prime Ministers of Sri Lanka since the creation of the position in 1947, prior to the formation of the Dominion of Ceylon. The Prime Minister of Ceylon was the head of the government until 1972. In 1972, the country was named as the Free, Sovereign and Independent Republic of Sri Lanka and the position was known as the Prime Minister of Sri Lanka from then onwards.

This book provides a collection of articles that reflect the current state of affairs in the blossoming field of World Englishes by bringing together several innovative synchronic and diachronic approaches. It contributes to the ongoing theoretical discussion concerning the criteria that make a low-frequency item represent an incipient change and examines the suitability of the sociolinguistics of globalisation theory for the study of non-traditional avenues for the spread of vernacular varieties of English (recent migrations, the entertainment industry, the web). It explores crucial aspects of language change and dialect evolution through the study of grammatical phenomena and the particular linguistic and socio-historical factors conditioning them. Together with theoretical questions, the volume shows a concern for methodological issues, such as sociolinguistic interviews, map-task experiments, metalinguistic comments, acceptability judgments and corpus-based methods. This volume represents the latest trends in the field and will undoubtedly set the agenda for the years ahead.

Today, English Language Teaching (ELT), especially English as a Second Language (ESL) and English as a Foreign Language (EFL), has been witnessing unprecedented changes in curriculum, teaching methodology, and the application of learning theories. This has created a demand for teachers who can teach English to learners of varied cultural, socio-economic and psychological backgrounds. This book discusses the modern trends, innovations, as well as the difficulties and challenges in teaching and learning ESL in a non-native context. The book, with contributions from many experts (each one specializing in a particular field) from countries such as UK, USA, Australia, New Zealand, India, Nigeria, Sri Lanka, China, and Japan, provides new methods, strategies and application-oriented solutions to overcome the problems in a practical way. The book deals with all topics pertinent to ESL and these are reinforced by a large number of examples and quotations from different sources. What distinguishes the text is its focus on modern innovations and use of technology in ELT/CLT (communicative language teaching). Teachers, teacher-trainees (B.Ed./M.A. Education/M.Ed.), and teacher-educators who are concerned with teaching English as a Second Language (ESL) should find this book immensely helpful.

This book, organised into 14 well-crafted chapters, charts the archaeology, folklore, heritage and landscape development of one of England's most enigmatic monuments, Old Oswestry Hillfort, from the Iron Age, through its inclusion as part of an early medieval boundary between England and Wales, to its role during World War I.

Like its two predecessors, Aspects of Old Frisian Philology (1990) and Approaches to Old Frisian Philology (1998), Advances in Old Frisian Philology combines contributions by specialists of medieval Frisian studies with papers by international specialists from adjacent fields who have been invited for the occasion to bring their expertise to the discipline of Old Frisian. Together, the diverse approaches considerably advance our knowledge of and insight into various aspects of Old Frisian philology.

This book is a collection of eleven research articles which altogether serve as a contribution to the study of verb complementation and other constructions, an area of investigation which bridges observations on the spectrum of lexico-grammar, syntax, and semantics. In terms of methodological approaches and the types of linguistic patterns examined, the chapters cast light on the subject from a variety of perspectives, and the volume is structured in a way that groups the various perspectives under three main themes according to their main focus and/or methodological approaches, namely: the semantic and functional descriptions of constructions; the investigation into the distribution of complementation patterns; and the study of innovative patterns in ESL contexts and languages other than English. All chapters in this volume employ data from large electronic corpora where possible - the BNC, COCA, COHA, GloWbE, NOW, and newly compiled corpora representing regional varieties of English.
