The commedia dell'arte, the improvised Italian theatre that dominated the European stage from 1550 to 1750, is arguably the most famous theatre tradition to emerge from Europe in the early modern period. Its celebrated masks have come to symbolize theatre itself and have become part of the European cultural imagination. Over the past twenty years a revolution in commedia dell'arte scholarship has taken place, generated mainly by a number of distinguished Italian scholars. Their work, in which they have radically separated out the myth from the history of the phenomenon remains, however, largely untranslated into English (or any other language). The present volume gathers together these Italian and English-speaking scholars to synthesize for the first time this research for both specialist and non-specialist readers. The book is structured around key topics that span both the early modern period and the twentieth-century reinvention of the commedia dell'arte.

Following the tradition and style of the acclaimed Index Islamicus, the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies.

The 14th century in Italian art is a very rich one, and Professor White's book gives architecture equal weight with painting and sculpture. The story of the Gothic style and the prehistory of the Renaissance is given: all the facts are related, but also the works of art are described with insight and for their own sakes, and not simply as data for fitting into schemes and theories. Among the great names are those of Arnolfo di Cambio, the Pisani, Cavallini, Cimabue, Duccio, Giotto, Simone Martini, and the Lorenzetti; among the buildings S. Croce, S. Maria Novella, the cathedral and the Palazzo Vecchio in Florence, and the cathedrals of Siena, Orvieto, and Milan, as well as churches, castles, and civic buildings from the Val d'Aosta to Sicily. The third edition of this work includes colour illustrations

and incorporates textual revisions and an updated bibliography.

Despite Burlington's fame, surprisingly little has been written about him. Lord Burlington: Architecture, Art and Life presents a modern reassessment of his career, while setting him in a broader context than has usually been the case, to reflect both his interests outside architecture and to present his character in the round. Architecture is given pride of place, but his other interests, in land-owning, politics and literature, are also examined, throwing much new light on an exceptionally significant and attractive figure.
