All over the world, young people are demanding action to protect our planet. In 2020 a new global deal for nature and people will be adopted, setting targets for the protection and conservation of the planet ' s biodiversity and ecosystems. It is of crucial importance that the voices of young people are heard when these new targets are set, as this will affect not only the present generation, but also future generations and their livelihoods. In the Nordic Region we want to make sure that the voices of the young people will be heard and therefore we have developed this toolkit for involving young people in setting new targets for the protection and sustainable use of biodiversity and ecosystems, thereby securing a new global deal for nature and people! The toolkit is made available to young people and those who want to engage young people in the development of a new global deal for nature and people. Anyone who wishes to arrange, facilitate and engage in youth consultations is invited to use the toolkit. The results can be communicated to decision-makers, the public and other relevant institutions and will be part of a bigger movement of youth around the world. The aim is to support young people, youth organisations and other interested groups in their facilitation of discussions on key issues relating to a new deal for nature and people, and to ensure the credibility of the results from the youth workshop. The Toolkit has been developed in close corporation with the Nordic Council and the Nordic Council of Ministers, in close corporation with young people from the Nordic countries.

This vintage book is a comprehensive manual on the building of model clipper ships, with information on constructing everything from the simplest waterline types to fine scale models fit for exhibition. With complete, easy-to-digest instructions and detailed illustrations, this volume is ideal for novice model enthusiast, and would make for a worthy addition to collections of related literature. Contents include: " Famous Clippers " , " Building Clipper Models " , " Making a
