physics homework solutions are a series of resources and materials designed to supplement class work and the existing textbooks in physics. They are formulated, not to help the student solve physics problems, but to equip them with basic physics concepts. Like finance homework solutions, it also equips them with reasoning skills necessary for application of physics concepts.

The overwhelming majority of PER work has concerned the introductory course, but the effective pedagogic techniques revealed by that research carry over directly into the modern physics course. The collection of research directly linked to topics in modern physics is much smaller but no less revealing. The University of Washington group has

questions that test
understanding of basic
physics concepts. These are
usually administered after
material has been covered in
lecture and prior to the
tutorial.
