They also are the psychological assets needed in today's corporate arena to make the most of opportunities and deal effectively with high-velocity change. Price Pritchett's Deep Strengths draws on his latest research, including data from more than 300 CEOs, to show how an organization's power comes from 10 inner forces that underlie its ability to produce results. These essential qualities are * Resilience * Confidence * Energy Level * Creativity & Innovation * Can-Do Attitude * Ambition * Hope * Happiness * Competitive Spirit * Staying Power As an advisor to executives, boards of directors, and senior managers for more than three decades, Pritchett has developed an intimate understanding of the necessary qualities for success, and has become one of the world's top thinkers on corporate culture, mergers, and organizational change. In this landmark work, he shows how the ten deep strengths found in every successful companycombine to drive organizational effectiveness. Pritchett then provides a new model and approach for "strength training" that you can put to work in your company. Make Your Own Damn Cheese is an engaging read that feeds off of the success of Spencer Johnson's New York Times bestseller Who Moved My Cheese, and Deepak Malhotra's ensuing response and Wall Street Journal bestseller, I Moved Your Cheese. Much deeper and far more edifying than a collection of platitudes or lighthearted fable, Make Your Own Damn Cheese is the kind of read that people love--especially those who enjoyed the first two tales of mazes and mice who conquer their fears and learn to adapt. This new twist on the beloved fable adapts Chuback's personal advice and wisdom that is practical, directly applicable, highly motivational, and leads to personal awareness and real-world achievement. Make Your Own Damn Cheese is short, quick, and effective. Chuback makes indirect but obvious reference to the first two books and states a case for self-reliance, entrepreneurship, and self-determination. The seven main characters are fashioned after major players in the history of personal development: Earl Nightingale, Napoleon Hill, Jim Rohn, Bob Proctor, Brian Tracy, Dennis Waitley, and Price Pritchett. In this variation, a young mouse seeking happiness and freedom (Earl), is guided by an elderly mouse (Napoleon) who brings him deep into a maze to be taught by other learned mice (Jim, Brian, Bob, Price, and Dennis). There, he learns what cheese really is and why it is important, and he also learns that he is really a human being and not a mouse at all--he has the power of choice, free will, and decision-making. He is joyfully astonished to learn that he does not have to spend his life chasing cheese--he learns to make his own damn cheese!

This eBook edition of "How to Get What You Want" has been formatted to the highest digital standards and adjusted for readability on all devices. Excerpt: "Getting what you want is success; and success is an effect, coming from the application of a cause. Success is essentially the same in all cases; the difference is in the things the successful people want, but not in the success. Success is essentially the same, whether it results in the attainment of health, wealth, development or position; success is attainment, without regard to the things attained. And it is a law in nature that like causes always produce like effects; therefore, since the success is the same in all cases, the cause of success must be the same in all cases." Wallace Delois Wattles (1860-1911) was an American author. As a New Thought writer, he remains personally somewhat obscure, but his writing has been widely quoted and remains in print in the New Thought and self-help movements. Wattles often travelled to Chicago, where he gave "Sunday night lectures" among several leading New Thought authors. He studied the writings of Georg Wilhelm Friedrich Hegel and Ralph Waldo Emerson and recommended the study of their books to his readers who wished to understand what he characterized as "the monistic theory of the cosmos." Wattles' best known work is a 1910 book called The Science of Getting Rich in which he explained how to become wealthy.

A prominent member of the New Thought movement, Henry Thomas Hamblin wrote extensively on some of the same concepts that have been revitalized in recent years through such works as The Secret. Go back to the source and tap into Hamblin's remarkably original approach to changing your life through the transformative power of thought.

Science has defined a variety of natural laws that explain the physical world and how it changes. One such law states that for every action there is a reaction, and that for every motion there is corresponding counter-motion. Whether it's visible to the human eye or not, one thing is certain – movement and change will occur as a result. Having studied these principles, author Raymond Holliwell not only understood the universal physical applications, he also understood the spiritual and mental applications as well. By using this law on a spiritual and mental level, Holliwell found that a specific thought could create a desired reaction in his personal and professional life through continual and dedicated practice. As he came to realize the expanded potential of this powerful law, he eventually recognized the ultimate source of the dramatic results – God.

"As a Man Thinketh" is a literary essay by James Allen, published in 1903. It was described by Allen as "... dealing with the power of thought, and particularly with the use and application of thought to happy and beautiful issues. Allen has tried to make the book simple, so that all can easily grasp and follow its teaching, and put into practice the methods which it advises. It shows how, in his own thought-world, each man holds the key to every condition, good or bad, that enters into his life, and that, by working patiently and intelligently upon his thoughts, he may remake his life, and transform his circumstances. It was also described by Allen as "A book that will help you to help yourself", "A pocket companion for thoughtful people", and "A book on the power and right application of thought.
